

VIVID SKYLIGHTS

Life is meant to be bright!

Why *Vivid Skylights?*

Vivid skylights transforms those dull areas of your home into inviting spaces.

From dark hallways to external walls built on the boundary brightening up your home has never been easier by installing a Vivid skylight.

Designed specifically for Australian homes by the owner, an experienced registered builder, our skylights are simple to install and can be installed into existing roofs. Filling a room with abundant light has never been so easy by installing a skylight.

Vivid skylights will save you on your electricity bills as your home will be flooded with natural light with no need to have the lights on during the day.

Whether it's the need for natural light in rooms where windows are not an option, or simply don't draw in enough light a Vivid skylight is the solution for you.

Vivid skylights can be installed with either a framed or frameless glass shaft. Looking up through the clear glass of your roof window you will see the ever-changing sky. By installing a skylight in your home, it will dramatically change the look and feel of that space making it much more inviting.

Vivid *Skylights*

Features

- All our skylights are double glazed with special self-cleaning agent applied to the glass
- Top of skylight is frameless that stops water pooling on the bottom edges in low pitch roof applications
- 10 Year leak free warranty (conditions apply)
- Compliant with Australian Standards for skylights AS4285, wind loads – non cyclonic regions AS4055 & overhead glazing AS1288

Options

- Available in x13 sizes in fixed, electric and solar opening
- Electric & Solar Powered opening skylights come with rain sensors and flyscreens
- Electric full block out blinds available to suit selected skylight sizes
- Wifi connectivity upgrade available for our electric skylights & blinds with simple to use mobile app
- Can be installed to have a frame or frameless glass finish internally
- Suits applications of both pitched tiled and corrugated iron roofs, with easy to install tiled roof flashing kit included for roofs installations between 15-45 degrees
- Can be installed on low pitch roofs 1-15 degrees.

Fixed *Skylights*

Vivid skylights have a range of skylights to suit any area in your home whether it be a hallway, bedroom, kitchen, bathroom, living or alfresco the choice is endless.

Skylights introduce a unique architectural element, turning ordinary spaces into extraordinary ones. They become a stunning focal point, significantly enhancing the aesthetic appeal of any room. Beyond their beauty, skylights offer notable health benefits. Exposure to natural light helps regulate circadian rhythms, promoting better sleep patterns and overall health. Experience the perfect blend of style and wellness with our fixed skylights to suit any area in your home.

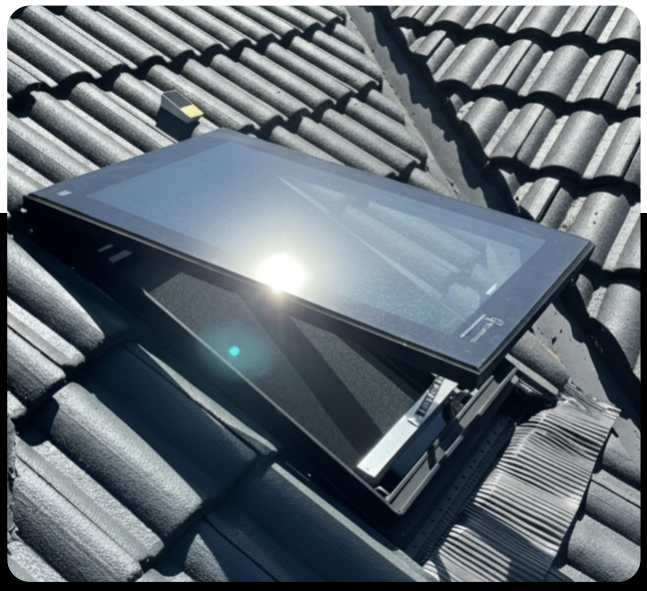

Electric & Solar Powered Opening *Skylights*

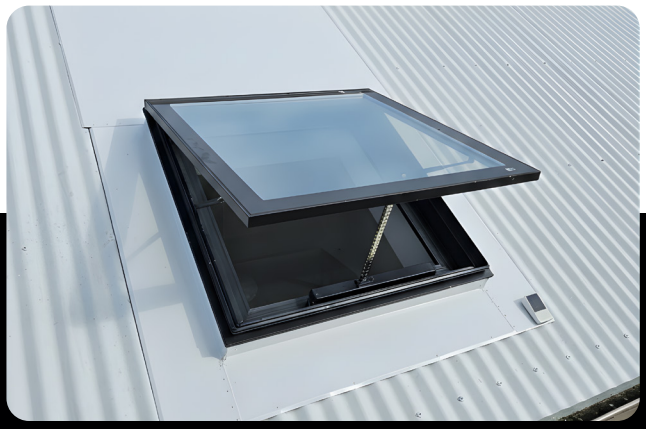

Improve the airflow in your living space by installing an openable skylight.

Our electric & solar powered skylights, equipped with a flyscreen, rain sensor, and remote control, are designed to open and increase passive airflow and fresh air circulation. This feature is especially beneficial in musty or humid areas, promoting a healthier indoor environment.

Love tech? Upgrade to our Wifi connect model and control your skylights from your phone.

*Wifi connect only available on electric opening skylights & blinds.

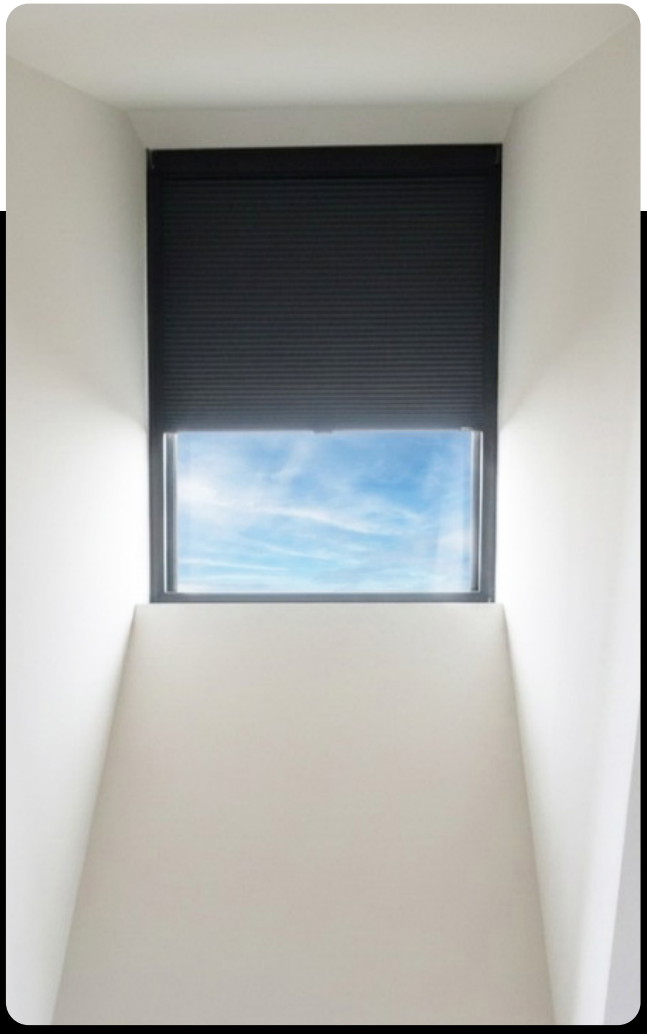

Electric *Blinds*

Enjoy the flexibility to control light and prevent glare, especially on hot days.

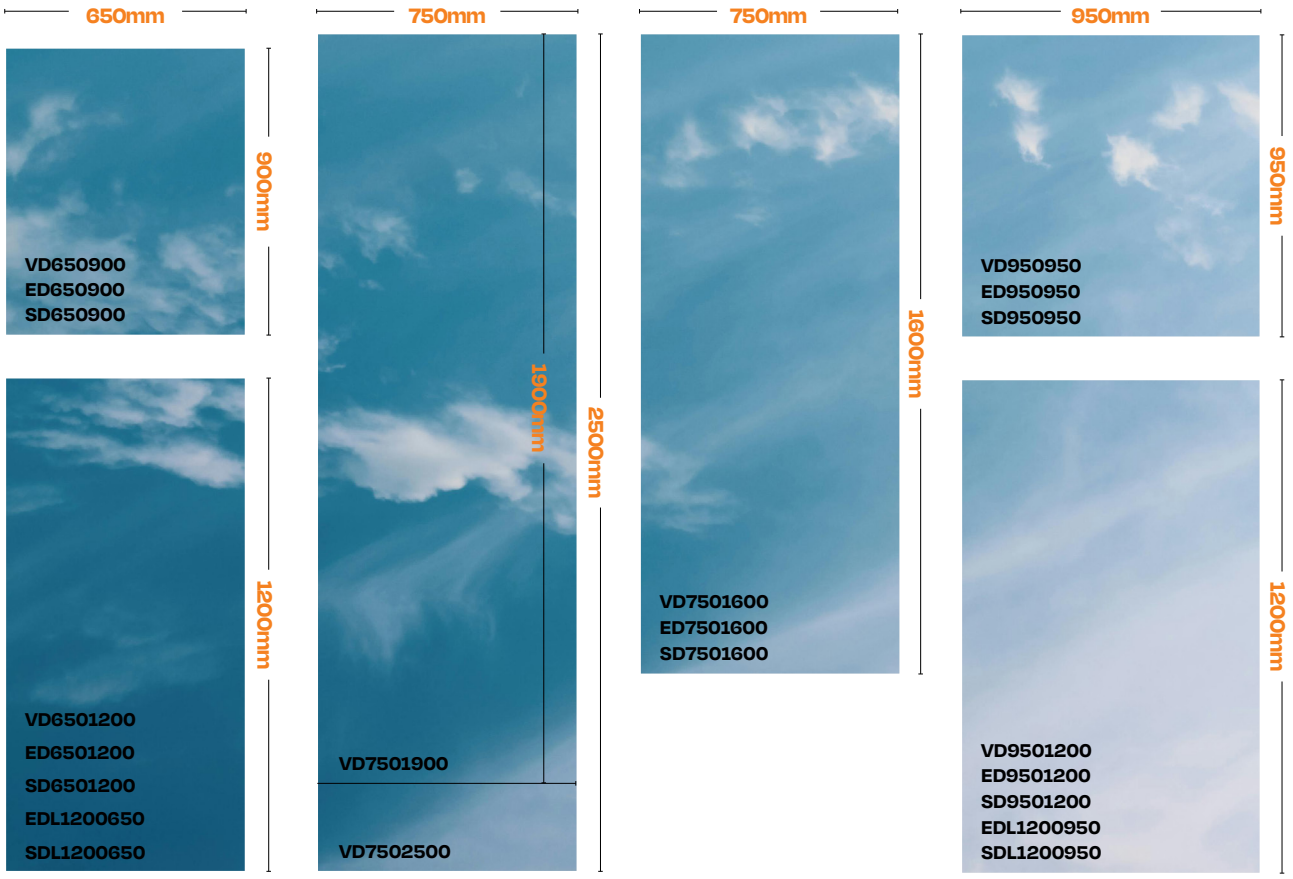

Perfect for bedrooms or lounge areas where you want to darken the room for TV viewing or sleep. Our 100% blockout honeycomb electric blinds are available in various sizes to suit your space.
